Platte Institute

Role: Regulatory Burden Reduction

ATLAS NETWORK PARTNER IMPACT: NORTH AMERICA — Nebraska is one of many states that have made it difficult to earn a living with burdensome licensure laws that protect entrenched special interests at the expense of both consumers and aspiring entrepreneurs. The Platte Institute in Omaha is playing a central role in reducing these laws and setting precedents that can be used as a regulatory reform model across the United States. “The Atlas Network has been a tremendous partner for the Platte Institute,” said Adam Weinberg, communications and outreach director at Platte Institute. “Atlas Network training and resources have helped us achieve our organizational goals and has brought our work to the attention of national and international audiences.” With Platte’s advocacy leading the way, the Nebraska legislature has adopted licensing reforms for more than fifteen professions, including barbers, cosmetologists, car salesmen, hair braiders, and others. Their efforts are also helping Nebraskans with past criminal convictions find out if they are eligible for licensure before wasting time and money on training. Platte’s signature model legislation has been praised by The Wall Street Journal editorial board as a standard for the nation. In 2016, the Platte Institute became involved in occupational licensing reform by supporting a movement to exempt natural hair braiding from cosmetology licensure. With their help, a reform bill was passed, but nearly 200 other professions in Nebraska still require state licensing, including some occupations not directly identified in state statutes. Each reduced licensing requirement means new opportunities for everyday Nebraskans to make a living by pursuing their passions. In 2018, Nebraska adopted the Occupational Board Reform Act, a comprehensive review of all state occupational licensing laws. Each state license must be scrutinized at least once every five years, in order to identify potential regulatory alternatives that would be less restrictive than licensing. In 2019, the Nebraska Legislature adopted a waiver for first-time occupational licensing fees for many low-income workers, military families, and young people, and more bills to reform or repeal individual licensing requirements have been heard in committee. Other states are beginning to take notice of “The Nebraska Model” for occupational licensing reform. Under the direction of two former state legislators, both of whom have led the fight for reform, Platte’s leadership is helping to raise national awareness of this challenge. The Platte Institute’s work on occupational licensing was a finalist for the 2019 Templeton Freedom Award.

Center for Indonesian Policy Studies

Role: Trade Liberalization

ATLAS NETWORK PARTNER IMPACT: ASIA — Indonesia’s rich and abundant farmland produces more than 30 million metric tons of rice annually, and yet 30 percent of Indonesian children suffer from malnutrition and other lingering effects of food insecurity. Why? The country’s protectionist trade policies have pushed local prices out of the reach of many low-income consumers, who simply cannot afford to buy enough rice to feed their families. The Center for Indonesian Policy Studies (CIPS) has been instrumental in combating an entrenched culture of bias against free markets in the food sector, especially after food prices spiked in the country. Their advocacy caught the attention of President Joko Widodo, who had rejected the idea of rice imports after his initial election in 2014. But with prices rising and more families suffering, Indonesia’s Ministry of Trade used CIPS’ research to make the case for removing restrictions on imports, opening up the market for consumers. CIPS’ Hak-MakMur campaign, which brings together experts in food security, poverty alleviation, nutrition, farming, and shipping, is reaching millions with the message of free trade. Using research to measure and track consumer food costs, CIPS shows how liberalized trade policies can help ensure access to affordable food. Bakoel Kosong (Empty Bowl), a new film on food insecurity inspired by Atlas Network’s Lights, Camera, Liberty workshop, jumpstarted discussions among young people, and CIPS’ media presence, with more than 1,300 articles between 2017-2019, are key to keeping the issue in the public consciousness.

Fundación Eléutera

Role: Tax Reform

ATLAS NETWORK PARTNER IMPACT: LATIN AMERICA — When the Honduran government began revising its tax code in 2014, Fundación Eléutera contributed fifteen different reforms that reinforce the rule of law and that protect the rights of Hondurans—specifically small business owners—by reducing arbitrary government intervention. Before these reforms, a business could be searched and shut down for almost any reason at any time, and the owners had to pay 100 percent of the fines levied against them before they could even have the chance of disputing the charges before a judge. As of now, large businesses have to pay 20 percent of the fine to take the dispute to court, and medium and small enterprises pay 10 percent and 5 percent respectively. Eléutera has also challenged this economic barrier to justice in the Supreme Court, with the final decision pending. Now, government agencies are required to obtain warrants before searching or suspending a business and follow strict due process. Additionally, businesses can only be shut down for breaking Honduran laws, not for violating administrative regulations (which can change rapidly and on short notice). And, if a business wishes to go to court and fight charges made against them by any government agencies, they only pay a fraction of the total fines. Over 2,200,000 Hondurans have benefitted from these reforms in just a short period of time. For their work to strengthen the rule of law in Honduras, Fundación Eléutera won the 2019 Latin America Liberty Award. “As Eléutera has gained traction and credibility in a country with limited experience in dealing with policy think tanks, the Atlas Network has helped us to train our team, connected us to many other organizations which can share their experiences, as well as boosted our effort through grants that help us fight above our weight class,” said Guillermo Peña Panting, president of Eléutera. “There is no other organization that has been better to ‘show us the way’ in this adventure.”

Students’ Organization for Liberty and Entrepreneurship (SOLE)

Role: Gender Equality

ATLAS NETWORK PARTNER IMPACT: AFRICA — Land is one of South Sudan’s most precious—and most disputed—resources, but for most women, cultural norms have pushed landownership out of reach. Although the
country has adopted legal protections that explicitly recognize the rights of women, the laws are often ignored in more isolated areas of the country, and a lack of knowledge fuels this deeply entrenched discrimination. Students’ Organization for Liberty and Entrepreneurship (SOLE), under the leadership of executive director John Mustapha Kutiyote, is laying the foundations for change to a system that continues to push women out of home ownership and onto the streets. At Atlas Network’s 2019 Africa Think Tank Shark Tank, Kutiyote’s winning project shared the stories of women treated as *de mara saki*, or “she’s just a woman,” a phrase that embodies the cultural prejudice that keeps women from asserting their private property rights. With the support of Atlas Network, SOLE launched an awareness campaign that includes special workshops, community meetings, and radio outreach to help women understand and assert their legal status. To date, more than 500 women have attended one of SOLE’s workshops in Yambio and Nzara, located in the country’s Western Equatoria state on the border of the Democratic Republic of the Congo. In bringing together women who have been affected by this harmful custom, Kutiyote has also sought to share positive growth that will inspire others. One enterprising woman told the audience that she had created a successful business that enabled her to send her children to school and feed her family. “I have 8 plots which I bought. I have put up some structures which are being used for renting. This training has confirmed to me that I was on the right track, but I have learned that obtaining a land lease is very important if I am to obtain loans from the bank.” With the goal of training at least 1,500 women and engaging another 8,000 people through community outreach and media, Kutiyote is making plans for the project to continue through the first half of 2020. “With Atlas Network’s support,” he says, “we can together change the culture of *de mara saki* into *de maa mara saki*: she is not ‘just’ a woman, but a woman who has the right and ability to own private property for prosperity.”

**Libertarian Club Libek**

*Role:* Political Information

ATLASE NETWORK PARTNER IMPACT: EUROPE — Libertarian Club Libek in Serbia won the 2018 Think Tank Shark Tank competition to create a news platform to inform the country’s contemporary political debate with daily political opinion and a classical liberal perspective on developments in the region. The seed funding from the Think Tank Shark Tank has made a world of difference for the success of the project, as Talas has become one of the leading independent outlets in Serbia, read on daily basis by political opinion leaders in media, political parties, government, and the opposition, as well as by business leaders and civil society leaders. Several thought leaders have even publicly stated that Talas is their favorite outlet for political commentary. “The funding from the Think Tank Shark Tank really planted the seed for the growth of our media outlet and the success it had in 2019,” said Petar Čekerevac, executive manager of Libek. “But equally important for our success in 2019 were Atlas Network training programs and networking opportunities, which helped us focus, avoid mistakes and secure additional funding. The Smith Fellowship in which I participated in 2018, and the Liberty Forum events were of fundamental importance to our work in 2019.” In November 2019 Libek had record-breaking website traffic of 500,000 website hits a month by over 372,000 users, and over 700,000 unique users visited the website in 2019. The growth in reach is followed by a steady growth of their community on social media, where they make over half a million impressions a month. Even the Prime Minister of Serbia, who Libek often criticizes, started following Talas from her personal Twitter account and gave an exclusive statement for Talas in August 2019. Talas content was quoted by the mainstream, independent, and local media in Serbia over 50 times in 2019, including the most popular political websites, TV, and print media in the country. Libek seeks to grow Talas into the most popular non-mainstream media online political outlet in Serbia and to continue to build their brand as the go-to place for quality political content. Talas has brought the classical liberal perspective on political and economic topics to all of those who value individual liberty, free markets, entrepreneurship, and peace in the Balkans.
